

### Project Progress Report - III Experiments/Error Analysis/Conclusion

Below is a sample outline for the 2nd project progress report. This is section 2 of your final report “Experiments”.

- 1) In the first report you talked about the problem that you will try to solve and what data you will use. In the second report you described what steps you took to solve that problem – what experiments you were running, what approaches you were considering and why.  
In this report, provide further information on the experiments and other work you have done since then. In particular, provide detailed analysis of your results, also provide error analysis – if some approach did not perform well, explain why you think it is the case and what did you learn from it.
- 2) Talk about the questions/concerns that you may have and also about what you this is giving you good results.  
Maximum number of pages: **4**. The report should be informative, include the required details but concise.

Make sure your submission Project Progress Report - III includes ALL, the Section 1 “Introduction and Data” (Project Progress Report–I) with the corrections after my comments and Section 2 “Experiments” (current progress report) and the progress report III. The idea is that you will keep adding to your report and in the end have the final report ready.

Make sure your first page has the project name and the names of all team members.

Page limit:

Section 1: 2 pages

Section 2: 3 pages

Section 3: 4 pages

#### Team Work VS Individual Contribution

You will be describing the work that you do as a whole team. When you talk about the tasks you personally did, please make it clear in your report. For example, “**our team** was evaluating the wiki words distribution to understand the overlap with the Bert vocabulary in our data. **I computed** the counts for each unique wiki word.

At the end of your progress report include the following table. This table should be the same for all students from the same team. Fill it out together. This table does not count in the page limit, put it on a separate page. Please, print your name in bold.

Project Name, Team Name

Student Name

Project Progress Report - III

1. INCLUDE YOUR PROGRESS REPORT I HERE. UPDATE YOUR PROGRESS REPORT 1 BASED ON MY COMMENTS.
2. INCLUDE YOUR PROGRESS REPORT II HERE. UPDATE YOUR PROGRESS REPORT 1 BASED ON MY COMMENTS
3. Experiments/Results
  - 3.1 Provide details on your work in the last 2 weeks. Focus on the results – provide good summaries of your results. Talk about parameter tuning, if it is required for your approach.
  - 3.2 Analyze your results. What approach/parameters are working well, what are not working well? Explain why you think it is the case
  - 3.3 Analyze the errors. If something did not work well, analyze why. For example, the approach may not be good for the data, in this case explain what characteristics of the data are causing it.

“Table What I contributed. Progress Report III”

Tasks	Tasks Description	Student 1 name	Student 2 name	Student 3 name	Student 4 name
Task 1					
Task 2					
Task 3					
Add more tasks if needed
